FORWARD/BACKWARD TILT AS STANDARD

HIDE/EXPOSE HOME BUTTON AND CAMERA

ACCOMMODATES TABLETS FROM 7.9" TO 10.5"

LANDSCAPE/ PORTRAIT ROTATION AS STANDARD

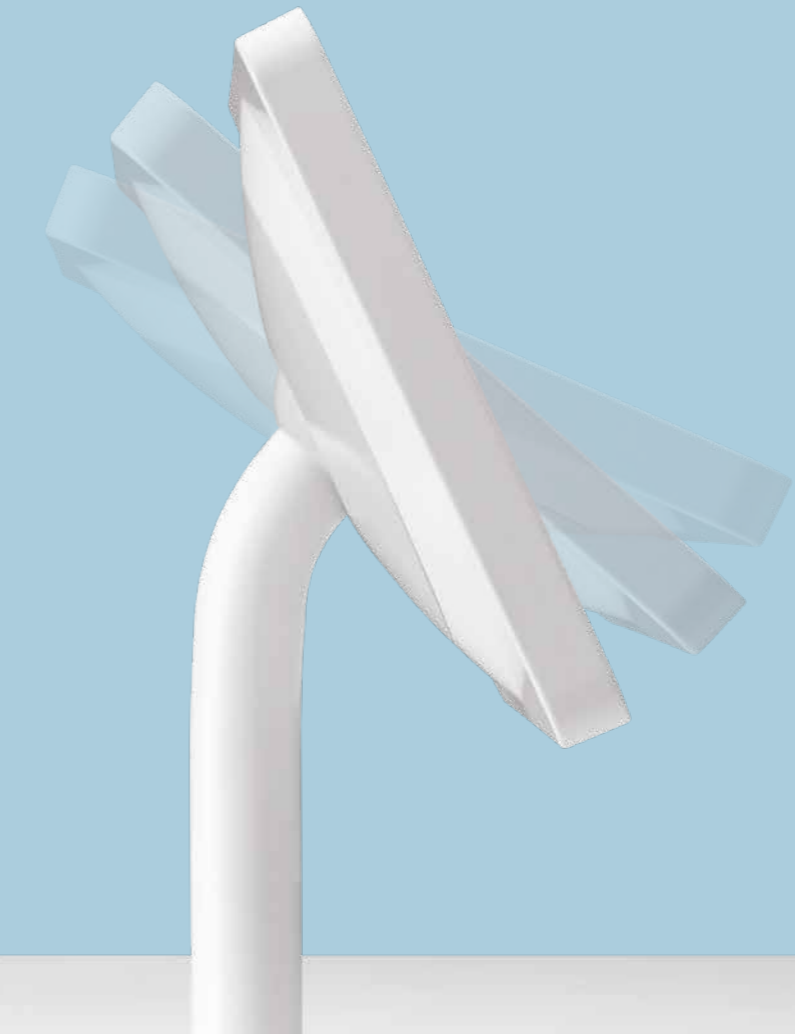

QUICK AND EASY INSTALLATION

Enhanced quality

Olive sets a new benchmark in quality for secure tablet mounts with the tablet fascia and housing each made of a durable single piece of cast aluminium, making them robust and secure.

The fascia has been designed to hold the tablet securely in place with several fastening points. Once the tablet is mounted, the fascia design allows it to 'slot' into the housing in a way which reduces leverage points and in turn increases security for the tablet.

Adjustments as standard

Olive offers extra features such as forwards and backwards tilt, and portrait to landscape adjustments as standard.

You have the choice during installation to switch these adjustments on or off to suit your needs. And if these needs change, each of these features can be reactivated with ease.

Practical applications. Practically applied.

Olive's versatility means it can be used across a variety of different applications in a variety of different settings.

From providing an in-store point of sale, support for digital signage, to touch screen input for restaurants, cafes and fast food establishments; Olive's practical applications are vast.

Hold and behold

With a choice of mounts; surface, wall in two height variations, VESA and low profile flat-to-wall mount, Olive provides a flexible and ergonomic way to use tablets in a secure mount.
